

Harshit Pratap Singh

Backend Engineer | Node.js | Golang | Distributed Systems
Bengaluru, India | singhharshitpratap@gmail.com | +91 7617075741
GitHub | LinkedIn

Summary

Backend Engineer with experience building scalable backend systems, billing platforms, and real-time infrastructure for EV charging and battery-swapping ecosystems. Experienced in Node.js, Golang, Kafka, Redis, PostgreSQL, and distributed systems with strong ownership across product engineering, backend architecture, and monetization systems.

Skills

Languages & Backend: TypeScript, JavaScript, Golang, Node.js, Express.js

Databases & Infrastructure: PostgreSQL, MongoDB, Redis, Kafka, Docker

Technologies: REST APIs, WebSockets, System Design, React.js, SvelteKit, TailwindCSS, Git, WebRTC

Experience

Kazam EV

Backend Engineer

Mar 2023 – Present

Bengaluru, India

- Built a dynamic tariff engine supporting time-based pricing, penalties, and configurable tariff rules, contributing to a 10% increase in CPO revenue.
- Designed and implemented a scalable Coupon Management System enabling referral programs, targeted campaigns, usage limits, and real-time coupon tracking.
- Developed an end-to-end Subscription Management System for battery-swapping operations with usage-based billing, lifecycle management, and consumption analytics.
- Improved revenue management workflows between drivers, operators, and stakeholders, enhancing operational efficiency and transaction handling.
- Automated operational workflows using cron jobs and watchdog-based monitoring systems to improve reliability and reduce manual intervention.
- Collaborated across backend and frontend systems using Node.js, Golang, Kafka, Redis, PostgreSQL, MongoDB, Docker, React.js, and SvelteKit.

Markopolo.ai

Backend Developer Intern

Jun 2022 – Sep 2022

Remote

- Integrated advertising APIs including Google Ads, Facebook Ads, and TikTok Ads for campaign automation workflows.
- Migrated backend services from Google Client Libraries to Google Ads REST APIs to improve maintainability and scalability.
- Implemented campaign hierarchy workflows including campaigns, ad groups, and ads with backend validation flows.
- Contributed technical documentation and collaborated closely with backend teams on integration tooling.

MAXTAP

Software Engineer Intern

Feb 2022 – Apr 2022

Bengaluru, India

- Implemented in-feed video advertisement features for internal testing and product experimentation.
- Developed moderation dashboards for content curators to improve review and filtering workflows.
- Collaborated with cross-functional teams on feature development and product improvements.

Projects

CrackIT

React.js, Node.js, WebRTC, Socket.IO

- Built a peer-to-peer interview platform with integrated video calling, low-latency messaging, and online coding support.
- Implemented real-time communication using WebRTC, RTCDataChannel, and Socket.IO for collaborative interviews.

Online IDE

React.js, Node.js, Docker

- Developed a browser-based IDE supporting Java, C++, and Python execution using isolated Docker containers.
- Implemented backend compilation and execution workflows using child-process execution pipelines.

Crypto Price Tracker

React.js, Axios, Chart.js

- Built a cryptocurrency dashboard displaying live market prices, BTC visualizations, and API-driven market updates.
- Implemented routing and responsive UI workflows using React Router and reusable frontend components.

Education

JSS Academy of Technical Education

Bachelor of Technology in Information Technology

2019 – 2023

Noida, India
